

July 12, 2005

Dear Friends and Colleagues:

It is with great pleasure that we are sending you our 2004/05 annual report. This report highlights the many activities the Centre for Health Evidence has undertaken in the last year and the opportunities and challenges in the year ahead.

Many of you have already experienced first hand the work we do at the Centre. In fact, it is because of these successful relationships that we find ourselves expanding through exceptionally exciting and promising new projects. 2005/06 is already shaping up to be a busy year.

On April 27, 2005, the Governors of the University of Alberta supported our application to become an official centre within the University of Alberta, Faculty of Medicine & Dentistry. After more than 5 years of operation, it is a healthy sign that CHE intends to continue to contribute to our community at large.

Thank you for the confidence you have in us. For those who know us by name only, we invite you to check out our Annual Report and read about the variety of projects undertaken last year. Better yet, check out our website ([www.cche.net](http://www.cche.net)) and learn more about the Centre's expertise in the areas of knowledge management, clinical decision support integration and practice-based evidence.

Feel free to contact us for more information.

Sincerely,

Dr. Robert Hayward
